Date: _____

APPLICATION FOR 2021 DUST CONTROL

Name: _____

Address: _____

Home Telephone No.: _____ Business Telephone No. _____

Address to be treated: _____

The Franklin County Dust Control Program consists of the application of liquid magnesium chloride to gravel roads in the County. Dust Control Programs are not required in the State of Kansas and Franklin County offers this service to the County residents in an effort to help abate the dust created by traffic. The application of dust control treatment will not eliminate dust. The effectiveness and duration of the dust control treatment is dependent on traffic volumes, weather, thickness of gravel, drainage, etc.

This is the only dust control program offered or recognized by the County. The County does not warrant the product in any way and the applicant agrees to hold Franklin County harmless for the failure of this product to control dust; this service will be provided by an independent contractor.

The deadline to apply for this program is April 2, 2021. Applications received after this date will be returned.

A single treatment application will be used. The exact date of the treatment application will depend on weather conditions and product availability. Flags will be provided by the County to be used for marking the area to be treated. These flags will be placed near your mailbox within ten days of the application date.

The resident will be responsible for marking the area to be treated. If the area to be treated is not clearly marked on the day of the application, this agreement is void and the payment will be returned.

The County will make every effort to not disturb the treated area during a period ending on September 20, 2021, but reserves the right to maintain the road at any time it is determined necessary to provide a safe public roadway. Neither refund nor retreatment will be made for shortened dust control treatment life resulting from required maintenance. After that time, the County will resume normal maintenance operations.

Maintenance activities on dust control areas, as with other parts of the county road system, will be solely at the discretion of the Road & Bridge Superintendent.

Please detail any special instructions below. Example: "Address does not match area to be treated" or "On corner lot, both roads to be treated," etc.

A signed copy of this application and full payment for the desired treatment should be sent to:

Franklin County Public Works
Attn: Dust Control 2021
1428 S. Main, Suite 5
Ottawa, KS 66067

(Make check payable to Franklin County Public Works.)

The cost for this treatment will be \$1.50 per foot plus an administrative fee of \$25 per location. A minimum of 300 feet is required. ($\$1.50 \times 300' = \$450.00 + \$25 \text{ Admin. Fee} = \475.00 minimum)

I/We hereby request that _____ feet of dust control agent be applied to the above listed address for the area to be treated. I/We agree to hold Franklin County harmless for failure of this product to control dust. My check for \$_____ is enclosed. I understand and agree to the terms of the Dust Control Program.
